Nicus' M-PWR is an integrated set of configurable IT Financial & Business Management tools designed to achieve true IT cost transparency and encourage informed budgeting.

NICUS M-PWR TECHNOLOGY - SAAS OR ON-PREMISE

No other solution provides a clearer picture of your IT dollars. M-PWR is a unique tool that identifies IT inefficiencies through dynamic budget reporting and can be offered as SaaS or deployed on premise.

WE'VE BEEN THERE

Nicus was founded by IT and financial management experts who have extensive experience in the IT financial and business management space. With a deliberate focus of one-on-one customer service, Nicus provides the most comprehensive and robust real world solutions available today to meet the needs of IT and financial managers.

ADAPTABILITY & AUTOMATION

M-PWR significantly reduces the time you spend slicing and dicing your data and lets you get back to informed budgeting and cost forecasting. Designed and developed with IT Financial Analysts from Fortune 500 companies, M-PWR automates your most complex tasks with a robust process engine that includes more than 150 built-in functions and customizable solutions to meet your needs.

SCALABILITY - SOLUTIONS FOR ORGANIZATIONS OF EVERY SIZE

From big to small, all IT departments face similar challenges: minimizing inevitable complexity, managing rapid change, coping with data integration issues, and helping end users understand, consume, and leverage their IT financial data. Nicus specializes in managing IT spend portfolios of all sizes.

Find out why our IT financial management solution is at work in some of the world's largest and most technologically advanced organizations.
